EM57

ULTRASONIC DISTANCE MEASURER

- Instant and accurate distance and acreage measurement by ultrasonic waves, an ideal tool for architects & layout designers
- Maximum measuring distance 18m (60ft)
- Area & volume computation
- Displays in imperial or metric values
- For indoor or outdoor use

Technical specifications

Distance range: 0.4~18m

Resolution: 0.01m (1/4 in)

Basic accuracy: $\pm 0.5\% + 1 \text{dgt}$ (in still air)

Frequency: 40KHz

Working temp: 0~50°C

The maximum distance & accuracy vary depending on environmental conditions such as temperature, humidity, altitude/barometric pressure & wind speed, etc.

Dimensions: 150x52x34mm, approx. 100g

Battery: 9Vx1, 6F22

Sinometer
